

DIODE MODULE

DD130F

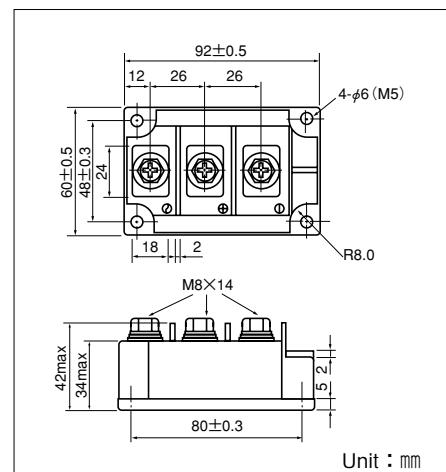

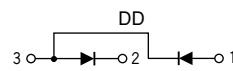

UL:E76102(M)

Power Diode Module **DD130F** series are designed for various rectifier circuits. **DD130F** has two diode chips connected in series in a package and the mounting base is electrically isolated from elements for simple heatsink construction. Wide voltage rating up to, 1,600V is available for various input voltage.

- Isolated mounting base
- Two elements in a package for simple (single and three phase) bridge connections
- Highly reliable glass passivated chips
- High surge current capability

(Applications)

Various rectifiers, Battery chargers, DC motor drives

Unit : mm

■ Maximum Ratings
