

DESCRIPTION

The RH1011 is a general purpose comparator with significantly better input characteristics than the LM111. Although pin compatible with the LM111, it offers four times lower bias current, six times lower offset voltage and five times higher voltage gain.

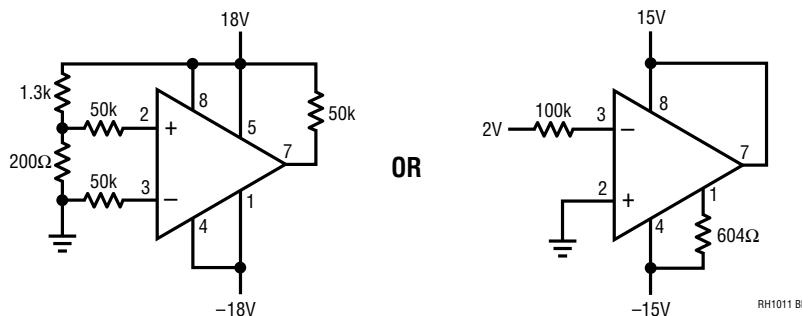

The wafer lots are processed to Linear Technology's in-house Class S flow to yield circuits usable in stringent military applications.

LTC, LTC and LT are registered trademarks of Linear Technology Corporation.

ABSOLUTE MAXIMUM RATINGS

Supply Voltage (Pin 8 to Pin 4)	36V
Output to Negative Supply (Pin 7 to Pin 4)	35V
Ground to Negative Supply (Pin 1 to Pin 4)	30V
Differential Input Voltage	$\pm 35V$
Voltage at STROBE Pin (Pin 6 to Pin 8)	5V
Input Voltage (Note 1)	Equal to Supplies
Output Short-Circuit Duration	10 sec
Operating Temperature Range (Note 2)	-55°C to 125°C
Storage Temperature Range	-65°C to 150°C
Lead Temperature (Soldering, 10 sec)	300°C

BURN-IN CIRCUIT

PACKAGE INFORMATION

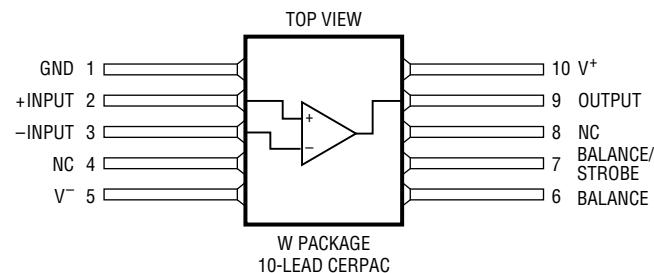

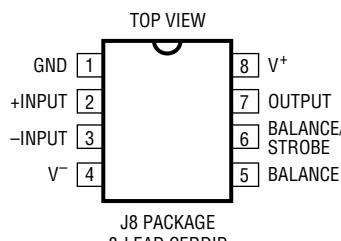

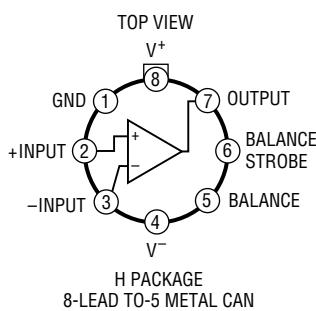

TABLE 1: ELECTRICAL CHARACTERISTICS (Preirradiation) (Note 10)

SYMBOL	PARAMETER	CONDITIONS	NOTES	T _A = 25°C			SUB-GROUP	-55°C			T _A	125°C			SUB-GROUP	UNITS
				MIN	TYP	MAX		MIN	TYP	MAX		MIN	TYP	MAX		
V _{OS}	Input Offset Voltage	R _S 50k	3 4		1.5 2.0		1				3.0 3.0	2,3 2,3		mV mV

TABLE 1A: ELECTRICAL CHARACTERISTICS (Postirradiation) (Note 10)

SYMBOL	PARAMETER	CONDITIONS	NOTES	10Krad(Si) MIN MAX	20Krad(Si) MIN MAX	50Krad(Si) MIN MAX	100Krad(Si) MIN MAX	200Krad(Si) MIN MAX	UNITS
	Positive Supply Current			4.0	4.0	4.0	4.0	4.0	mA
	Negative Supply Current			2.5	2.5	2.5	2.5	2.5	mA
	Strobe Current	Minimum to Ensure Output Transistor is Truned Off	7,9	500	500	500	500	500	μA
	Input Capacitance			6 (Typ)	6 (Typ)	6 (Typ)	6 (Typ)	6 (Typ)	pF

Note 1: Inputs may be clamped to supplies with diodes so that maximum input voltage actually exceeds supply voltage by one diode drop. See Input Protection discussion in the LT®1011 data sheet.

Note 2: $T_{JMAX} = 150^\circ\text{C}$.

Note 3: Output is sinking 1.5mA with $V_{OUT} = 0V$.

Note 4: These specifications apply for all supply voltages from a single 5V to $\pm 15V$, the entire input voltage range and for both high and low output states. The high state is $I_{SINK} = 100\mu\text{A}$, $V_{OUT} = (V^+ - 1V)$ and the low state is $I_{SINK} = 0.8\text{V}$. Therefore, this specification defines a worst-case error band that includes effects due to common mode signals, voltage gain and output load.

Note 5: Drift is calculated by dividing the offset difference measured at minimum and maximum temperatures by the temperature difference.

Note 6: Response time is measured with a 100mV step and 5V overdrive. The output load is a 500 resistor tied to 5V. Time measurement is taken when the output crosses 1.4V.

Note 7: Do not short the STROBE pin to ground. It should be current driven at 3mA to 5mA for the shortest strobe time. Currents as low as 500μA will strobe the RH1011 if speed is not important. External leakage on the STROBE pin in excess of 0.2μA when the strobe is “off” can cause offset voltage shifts.

Note 8: See graph, Input Offset Voltage vs Common Mode Voltage on the LT1011 data sheet.

Note 9: Guaranteed by design, characterization or correlation to other tested parameters.

Note 10: $V_S = \pm 15V$, $V_{CM} = 0V$, $R_S = 0$, $T_A = 25^\circ\text{C}$, $V_1 = -15V$, output at Pin 7, unless otherwise noted.

TABLE 2: ELECTRICAL TEST REQUIREMENTS

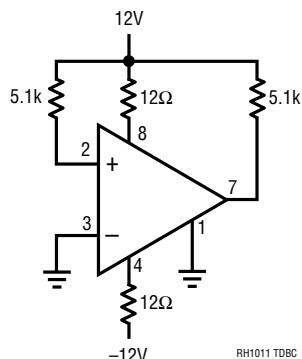

MIL-STD-883 TEST REQUIREMENTS	SUBGROUP
Final Electrical Test Requirements (Method 5004)	1*,2,3,4
Group A Test Requirements (Method 5005)	1,2,3,4
Group C and D End Point Electrical Parameters (Method 5005)	1

* PDA Applies to subgroup 1. See PDA Test Notes.

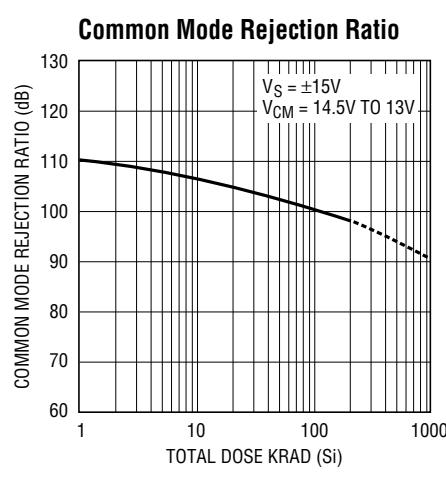

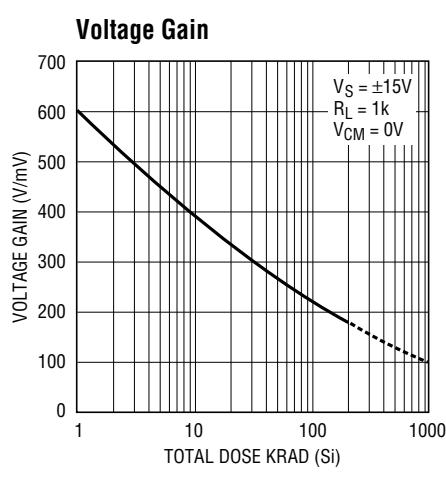

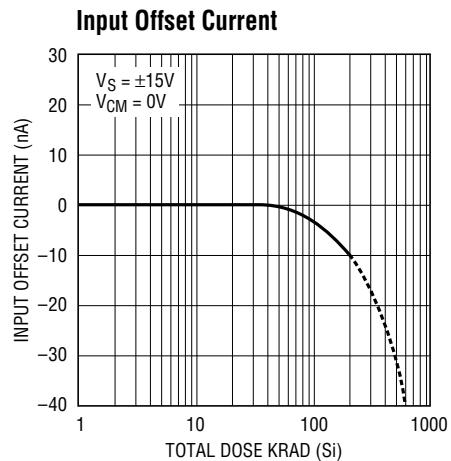

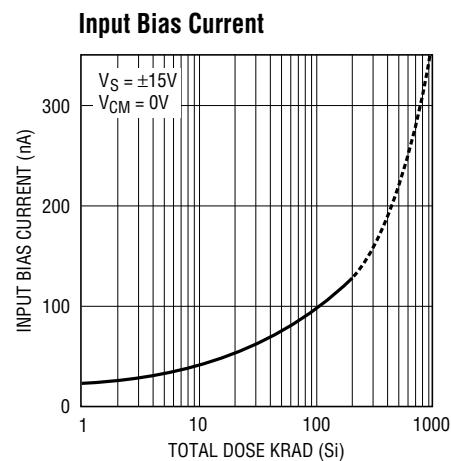

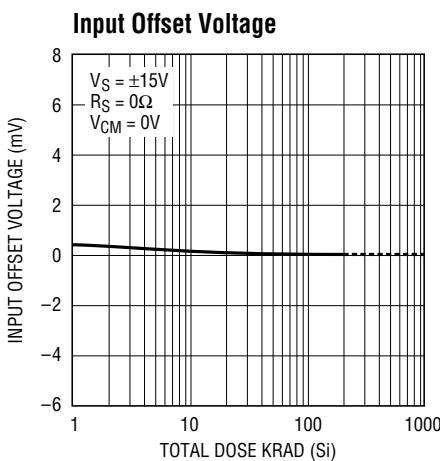

PDA Test Notes

The PDA is specified as 5% based on failures from group A, subgroup 1, tests after cooldown as the final electrical test in accordance with method 5004 of MIL-STD-883 Class B. The verified failures (including Delta parameters) of group A, subgroup 1, after burn-in divided by the total number of devices submitted for burn-in in that lot shall be used to determine the percent for the lot.

Linear Technology Corporation reserves the right to test to tighter limits than those given.
