

Professional Ceramic Capacitors - Class I, II and III

MIL-STD-202F

The professional ceramic disc capacitors were specially developed for applications in severe environmental conditions, high humidity, temperature, gas, vapor and solvents.

The capacitors are flame retardant epoxy coated, meeting UL 94-V0 flammability specifications. The capacitors are 100% screened on following electrical parameters:

Capacitance, loss factor, test voltage. After the 100% test, the capacitors are audited on its electrical and mechanical parameters with following AQL:

Electrical parameters: 0.065% level II Mechanical parameters: 0.65% level II

The capacitors withstand the following reliability essays:

Terminal strength: method 211 - condition A

Resistance to solvents: method 215

Resistance to soldering heat: method 210 - condition B

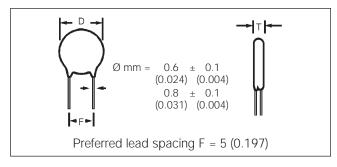

Solderability: method 208

Thermal shock: method 107 - condition A

Humidity (steady state): method 103 – condition D Life (at elevated ambient temperature): method 108 – $\,$

condition D

Operating temperature and storage: -55... +125° C

Dimension Table - Class II

Low and Medium Voltage Professional

DIELECTRIC - CLASS II

These ceramic capacitors have a high dielectric constant, making possible high capacitance values in reduced dimensions, however temperature coefficient and loss factor are greater than Class I.

Typical applications are decoupling and by pass.

100V AND 500V PERFORMANCE CHARACTERISTICS CLASS II

Measured at	1.0 kHz / 0.3 Vrms / 25°C
Dissipation Factor	X5E / X5F / X5P ≤ 2.5% X5U / X5V / Z5V ≤ 3.0%
Capacitance Tolerance	X5E / X5F / X5P → ±10% X5U / X5V / Z5V → -20 +50% X5E / X5F / X5P / X5U / → ±20%
Insulation Resistance	@ V_R → ≥ 10 GΩ

Dielectric Strength NOTE: Charging current limited to 50 mA	$V_R = 100V \rightarrow Vt = 250V (DC)$ $V_R = 500V \rightarrow Vt = 1250V (DC)$ Between leads and body insulation
Operating Temperature Range (°C)	-55 +125 Epoxy Coated
Climatic Category	55 / 085 / 56

Note: Damp Heat Steady State: 90... 95% R.H. 40°C / 56 days. No voltage to be applied.

Tape and Reel Specifications

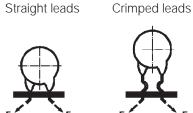

There are two types of taped disc ceramic capacitors: Straight or crimped leads.

Both types can be shipped on reels or ammopack.

The standard packaging quantities are shown bellow:
