/*
*****

*   File Name: w25p243a.v
*   Product:   W25P243A
*   Features:  64k x 64 burst pipelined SRAM
*               access time: 4.5ns
*               pipelined data output capability
*               2T/1T mode Signal cycle deslected mode
*               Intel burst mode & linear burst mode selection (LBO)
*               Packaged in 128-pin QFP and TQFP
*
*   Date : March 2, 1999
*           Written by Lin, Hung-Hsueh
*           Email Address : hhlin@winbond.com.tw
*
*   Verilog model for 64kx64 Burst Pipelined SRAM
*   (Tested on Verilog-XL 2.2.27)
*
*
*   Memory Product Dept.(PM20)
*   Winbond Electronics Crop.
