

Couplers

PCS DUAL DIRECTIONAL COUPLERS

- High Directivity for Precise Measurement Needs
- System Transparent - Low VSWR, Low Insertion Loss
- Both 7/16 DIN and Type N Connector Versions
- Extremely Low IM Design

DESCRIPTION

Narda's Dual High Power Directional couplers are specifically designed for the PCS band. Both models are for use in the transmit (Tx) antenna link and are designed

specifically to achieve high directivity, typically 30 dB, and offer high peak and average power performance while offering extremely low intermodulation products.
