

● Absolute Maximum Ratings

Parameter	Symbol	Limits	Unit
Input voltage	V_i	-190	V
Output current	I_o	850	mA _{pk}
ESD endurance	V_{surge}	2	kV
Operating temperature range	T_{opr}	-20 ~ +80	°C
Storage temperature range	T_{stg}	-25 ~ +105	°C

● Dimension(Unit : mm)

● Electrical Characteristics

Parameter	Symbol	Min.	Typ.	Max.	Unit	Conditions
Input voltage range	V_i	-162	-141	-120	V	DC(80~120VAC)
Output voltage	V_o	-13	-12	-11	V	$V_i = -141\text{V}$, $I_o = 800\text{mA}$
Output current	I_o	0	—	800	mA	$V_i = -141\text{V}$ *1
Line regulation	V_r	—	0.20	0.45	V	$V_i = -120 \sim -162\text{V}$, $I_o = 800\text{mA}$
Load regulation	V_l	—	0.50	0.75	V	$V_i = -141\text{V}$, $I_o = 0 \sim 800\text{mA}$ *2
Output ripple voltage	V_p	—	0.15	0.30	V _{p-p}	$V_i = -141\text{V}$, $I_o = 800\text{mA}$
Power conversion efficiency	η	65	78	—	%	$V_i = -141\text{V}$, $I_o = 800\text{mA}$ *2

*1 Maximum output current varies depending on ambient temperature ; please refer to derating curve.

*2 Please refer to Load regulation, Conversion efficiency.

● Derating Curve

● Application circuit

For actual usage, Please kindly evaluate and confirm our part mounted in your product. Especially, Please make sure to confirm whether the load current exceed Max. rated current by using the current probe.

External components setting

FUSE: Fuse

C1: Capacitor for input voltage smoothing

C2: For noise terminal voltage reduction

C3: Capacitor for Output voltage smoothing

D1: Flywheel diode

D1: Rectifier diode

L1: Choke coil

R1: For noise terminal voltage reduction

ZNR: Varistor

Please make sure to use quick acting fuse 2A

Capacitance : 47µF~220µF Rated voltage : 200V or higher
Ripple current is 0.22Arms above.

Capacitance : 0.1µF~0.22µF Rated voltage : 200V or higher
Film capacitor or ceramic capacitor. Reduce the noise terminal voltage.
The constant value should be evaluated in the set.

Capacitance : 330µF~1000µF Rated voltage : 25V or higher,
ESR is 0.08Ω max. Ripple current is 1Arms above.
Output noise voltage is influenced. Please evaluate it in the actual set.

Please use the first recovery diode that reverse peak voltage is 400V or higher, and the average rectifying current is 3A or higher. That switching characteristic and efficiency of our module is influenced by this diode characteristic, please use 31DF4(Nihon inter), or RV30(Sanken).
In the absolute maximum ratings, the reverse peak voltage should be 400V or higher, the average rectifying current should be 1A or higher, and the peak surge current should be 20A or higher.
(Full-wave rectifier can be used in our part.)

Coil for switching regulator. The inductance should be 330µH, the rated direct current should be 1.6A above.
Otherwise heating or abnormal oscillation occurs.

1Ω~2.2Ω 1/4W
Reduce the noise terminal voltage. The constant value should be evaluated in set.

Varistor must be used. It protects this part from lightning surge and static electricity.

Precautions on Use of ROHM Power Module

Safety Precautions

- 1) The products are designed and produced for application in ordinary electronic equipment (AV equipment, OA equipment, telecommunication equipment, home appliances, amusement equipment etc.).
If the products are to be used in devices requiring extremely high reliability (medical equipment, transport equipment, aircraft/spacecraft, nuclear power controllers, fuel controllers, car equipment including car accessories, safety devices, etc.) and whose malfunction or operational error may endanger human life and sufficient fail-safe measures, please consult with the Company's sales staff in advance. If product malfunctions may result in serious damage, including that to human life, sufficient fail-safe measures must be taken, including the following:
 - [a] Installation of protection circuits or other protective devices to improve system safety
 - [b] Installation of redundant circuits in the case of single-circuit failure
- 2) The products are designed for use in a standard environment and not in any special environments. Application of the products in a special environment can deteriorate product performance. Accordingly, verification and confirmation of product performance, prior to use, is recommended if used under the following conditions:
 - [a] Use in various types of liquid, including water, oils, chemicals, and organic solvents
 - [b] Use outdoors where the products are exposed to direct sunlight, or in dusty places
 - [c] Use in places where the products are exposed to sea winds or corrosive gases, including Cl₂, H₂S, NH₃, SO₂, and NO₂
 - [d] Use in places where the products are exposed to static electricity or electromagnetic waves
 - [e] Use in proximity to heat-producing components, plastic cords, or other flammable items
 - [f] Use involving sealing or coating the products with resin or other coating materials
 - [g] Use involving unclean solder or use of water or water-soluble cleaning agents for cleaning after soldering
 - [h] Use of the products in places subject to dew condensation
- 3) The products are not radiation resistant.
- 4) The Company is not responsible for any problems resulting from use of the products under conditions not recommended herein.
- 5) The Company should be notified of any product safety issues. Moreover, product safety issues should be periodically monitored by the customer.

Precautions Regarding Application Example and External Circuits

- 1) If change is made to the constant of an external circuit, allow a sufficient margin due to variations of the characteristics of the products and external components, including transient characteristics, as well as static characteristics. Please be informed that the Company has not conducted investigations on whether or not particular changes in the application examples or external circuits would result in the infringement of patent rights of a third party.
- 2) The application examples, their constants, and other types of information contained herein are applicable only when the products are used in accordance with standard methods.
Therefore, if mass production is intended, sufficient consideration to external conditions must be made.

Prohibitions Regarding Industrial Property

- 1) These Specifications contain information related to the Company's industrial property. Any use of them other than pertaining to the usage of appropriate products is not permitted. Duplication of these Specifications and its disclosure to a third party without the Company's permission is prohibited.
- 2) Information and data on products, including application examples, contained in these specifications are simply for reference; the Company does not guarantee any industrial property rights, intellectual property rights, or any other rights of a third party regarding this information or data. Accordingly, the Company does not bear any responsibility for:
 - [a] infringement of the intellectual property rights of a third party
 - [b] any problems incurred by the use of the products listed herein.
- 3) The Company prohibits the purchaser of its products to exercise or use the intellectual property rights, industrial property rights, or any other rights that either belong to or are controlled by the Company, other than the right to use, sell, or dispose of the products.
