Transistors

DTC144TKA / DTC144TSA

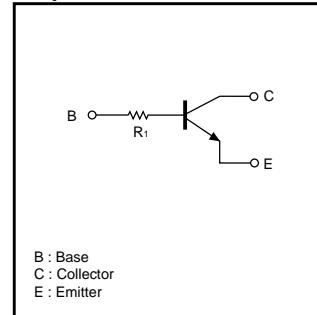

Digital transistors (built-in resistor)

DTC144TM / DTC144TE / DTC144TUA / DTC144TKA / DTC144TSA

●Features

- 1) Built-in bias resistors enable the configuration of an inverter circuit without connecting external input resistors (see equivalent circuit).
- 2) The bias resistors consist of thin-film resistors with complete isolation to allow negative biasing of the input. They also have the advantage of almost completely eliminating parasitic effects.
- 3) Only the on/off conditions need to be set for operation, making device design easy.
