Specifications and Applications Information

08/04/00 Preliminary

The E1950 (E200II Series) dc to ac inverter is specifically designed to power the Sharp LQ10D421 LCD display to a moderate brightness level from a +12 volt dc source.

The E1950's small size and encapsulated package makes it the ideal power source for applications where small size, high efficiency and reliability are critical.

This inverter is designed to satisfy the most common cold-cathode lighting requirements for the Sharp LQ10D421 LCD display. Custom units, providing different inputs, outputs or package refinements are available.
