

## ■ EX905

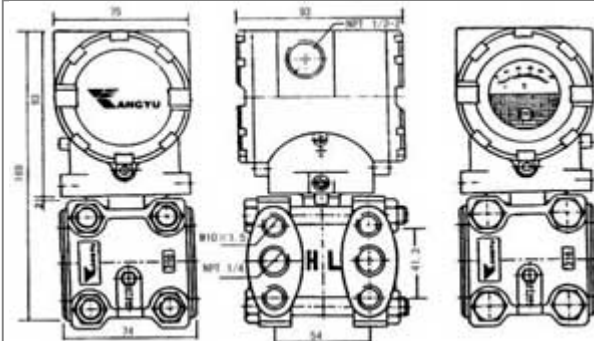

### Specification

|                          |                                                                       |
|--------------------------|-----------------------------------------------------------------------|
| Media                    | liquid, gas, steam                                                    |
| Output signal            | 4 ~ 20mA DC ( two lines )                                             |
| Operating voltage        | 12 ~ 45 VDC, standard 24 VDC $\pm$ 5%                                 |
| Media temperature        | -40 ~ 104 °C ( full silicon oil )<br>-18 ~ 71 °C ( full inertia oil ) |
| Surroundings temperature | -25 ~ 90 °C                                                           |
| Relative humidity        | 0 ~ 100%                                                              |
