

# HD29026A/HD29027/HD29028

Dual CCD Drivers

# HITACHI

ADE-205-001 (Z)  
1st. Edition  
Jul. 1990

## Description

HD29026A, HD29027 and HD29028 include two on-chip drivers on a single chip, making it the optimal choice as a CCD driver. Operation is provided with a TTL level input, and output current of 1 A is available for both sink and source.

## Features

- High speed output rise and fall (20 ns typ) at load capacitance ( $C_L$ ) of 1000 pF
- Direct drive of input block by TTL eliminates the need for external components
- Output swing voltage of 12 V; output current of 1 A available for both sink and source
- Output wave cross point 50% typ

## Ordering Information

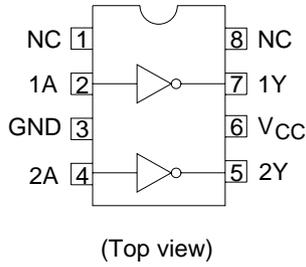

Product name	Supply voltage	Package
HD29026AP	12 V	300 mil 8-pin plastic DIP (DP-8)
HD29026AFP		225 mil 8-pin plastic SOP (FP-8D)
HD29027P	6 V	300 mil 8-pin plastic DIP (DP-8)
HD29027FP		225 mil 8-pin plastic SOP (FP-8D)
HD29028P	12 V	300 mil 8-pin plastic DIP (DP-8)
HD29028FP		225 mil 8-pin plastic SOP (FP-8D)

## Function Table

Input A	Output Y
H	L
L	H

Note: H: High level  
L: Low level

## Pin Arrangement

## Absolute Maximum Ratings

Item	Symbol	Rating	Unit	
Supply voltage	HD29026A	$V_{CC}^{*1}$	15	V
	HD29027		10	
	HD29028		15	
Input voltage	$V_I$	7	V	
Output peak current	$I_{O(peak)}$	$\pm 1$	A	
Operating temperature range	$T_a$	-20 to +75	$^{\circ}C$	
Storage temperature range	$T_{stg}$	-65 to +150	$^{\circ}C$	
Junction temperature	$T_j$	150	$^{\circ}C$	
Total dissipation	$P_T^{*2}$	DP-8	1	W
		FP-8D	0.735	

Notes: 1. If no value is specified, the voltage is defined by the GND pin.

2. Value when  $T_a = 25^{\circ}C$ . Heat dissipation is required for large-capacitance, high-frequency drivers, so derating of 8 mW/ $^{\circ}C$  (DP-8) and 5.9 mW/ $^{\circ}C$  (FP-8D) are required.

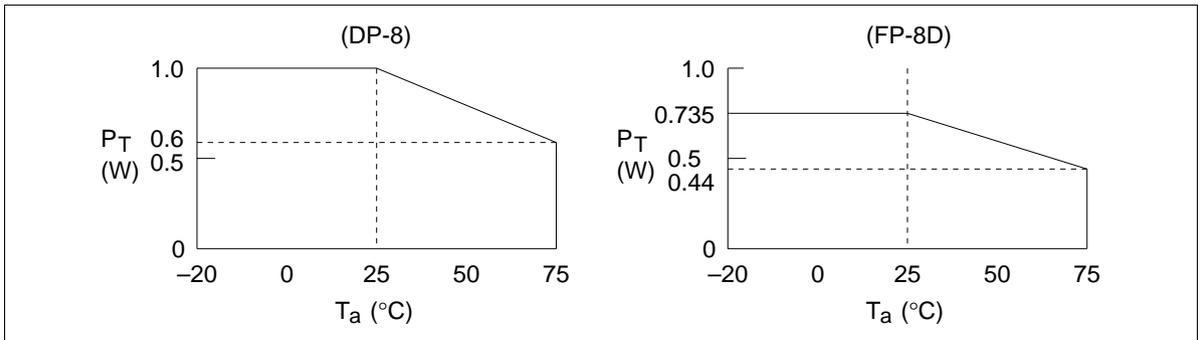

Figure 1 Package Derating Curves

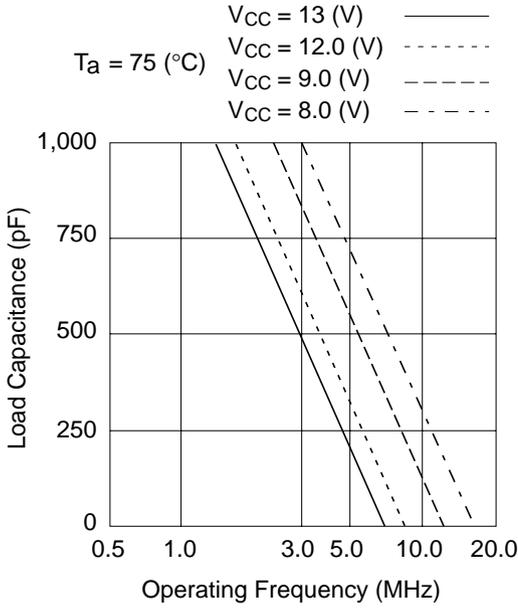

**Recommended Operating Conditions**

<b>Item</b>		<b>Symbol</b>	<b>Min</b>	<b>Typ</b>	<b>Max</b>	<b>Unit</b>

Typical Characteristic Curves

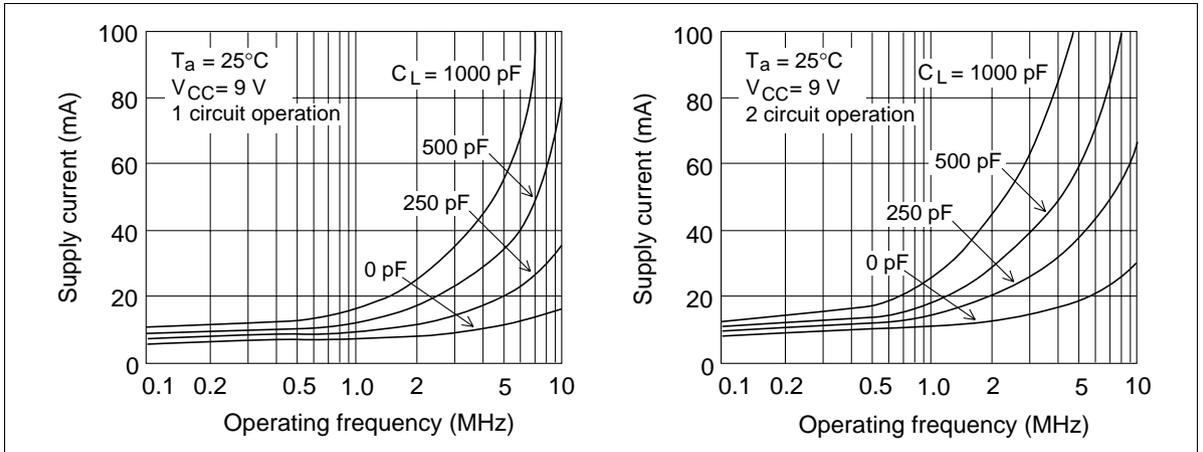

Supply current vs. operating frequency (HD29026A)

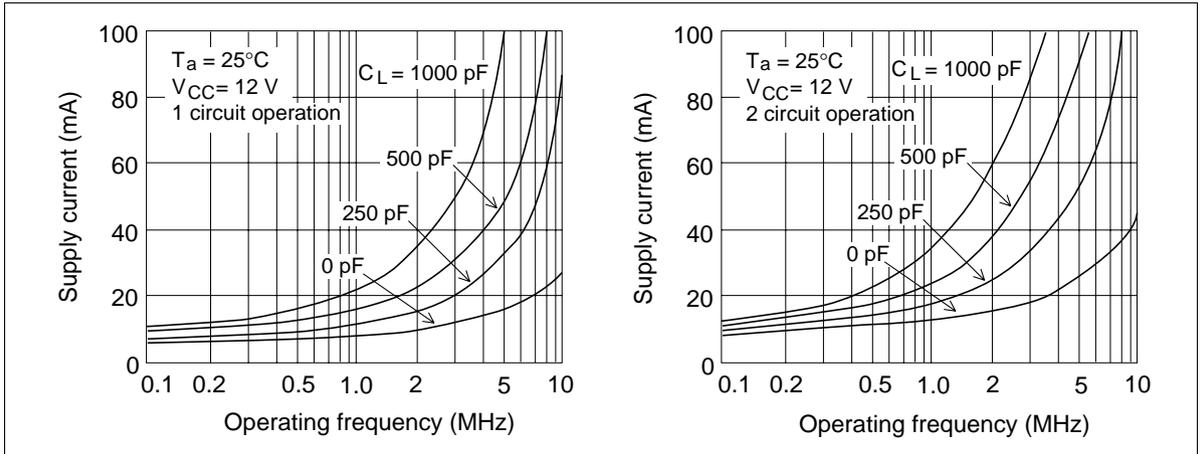

**Supply current vs. operating frequency (HD29027)**

**Supply current vs. operating frequency (HD29028)**

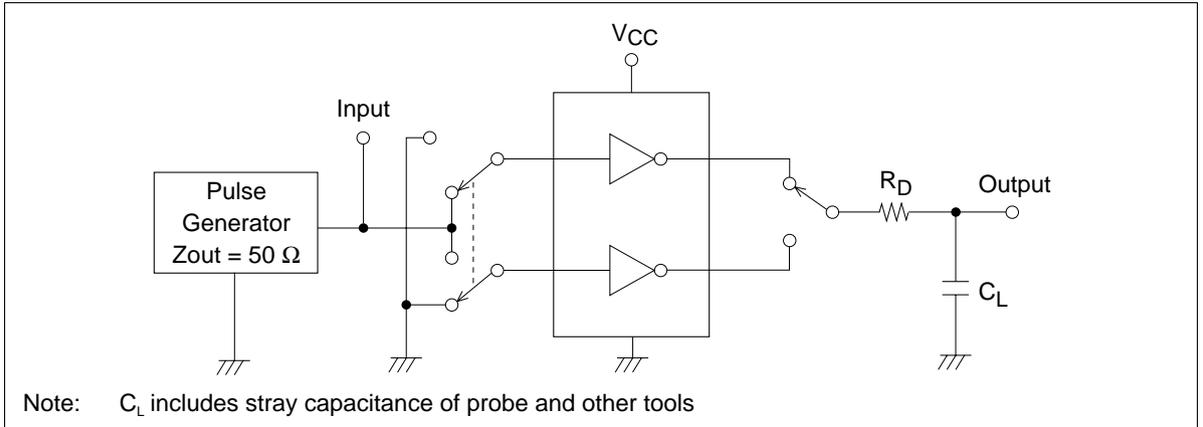

**Cautions (HD29026A only)**

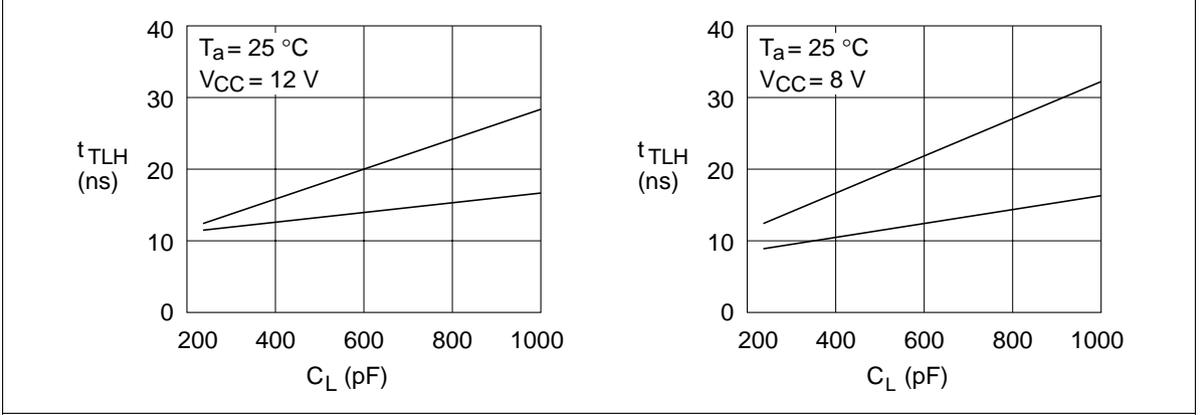

The short output rise and fall time, as well as the large output amplitude of this product tends to generate overshooting and undershooting. The connection of 5 to 15 damping resistance ( $R_D$ ) to the output as illustrated in figure 2 serves to

increase the output rise and fall time, making it possible to reduce the chance of overshooting and undershooting. Figure 3 shows the characteristics that result for a damping resistance ( $R_D$ ) of 10 .

**Cautions**

1. Hitachi neither warrants nor grants licenses of any rights of Hitachi's or any third party's patent, copyright, trademark, or other intellectual property rights for information contained in this document. Hitachi bears no responsibility for problems that may arise with third party's rights, including intellectual property rights, in connection with use of the information contained in this document.
2. Products and product specifications may be subject to change without notice. Confirm that you have received the latest product standards or specifications before final design, purchase or use.
3. Hitachi makes every attempt to ensure that its products are of high quality and reliability. However, contact Hitachi's sales office before using the product in an application that demands especially high quality and reliability or where its failure or malfunction may directly threaten human life or cause risk of bodily injury, such as aerospace, aeronautics, nuclear power, combustion control, transportation, traffic, safety equipment or medical equipment for life support.
4. Design your application so that the product is used within the ranges guaranteed by Hitachi particularly for maximum rating, operating supply voltage range, heat radiation characteristics, installation conditions and other characteristics. Hitachi bears no responsibility for failure or damage when used beyond the guaranteed ranges. Even within the guaranteed ranges, consider normally foreseeable failure rates or failure modes in semiconductor devices and employ systemic measures such as fail-safes, so that the equipment incorporating Hitachi product does not cause bodily injury, fire or other consequential damage due to operation of the Hitachi product.
5. This product is not designed to be radiation resistant.
6. No one is permitted to reproduce or duplicate, in any form, the whole or part of this document without written approval from Hitachi.
7. Contact Hitachi's sales office for any questions regarding this document or Hitachi semiconductor products.
