- 2:1 wide input voltage range
- 30 models available including 2.1V and 3.3V outputs
- Indefinite short circuit protection
- EN55022 conducted emissions level A
- Designed to meet EN60950 and IEC950

The HPD15 series of DC/DC converters offer 15 Watts of output power in a high density 2 x 2 inch case. A range comprises 30 models with 2:1 wide input voltages of 9-18V, 18-36V and 36-72VDC. Single, dual and triple outputs are available with 2.1V and 3.3V single outputs suitable for low voltage logic requirements. Standard features of the HPD15 series include indefinite short circuit protection and undervoltage lockout. The series meets EN55022 level A conducted and radiated emissions. In addition to this, all outputs are regulated and isolated from the input. Typical applications are on board logic or analog circuits supplied by telecom distribution power voltages, cellular and telecommunications systems.

- Extended operating temperature range is available as an option. To specify a HPD15 that operates down to -25°C, add the suffix '-4' to the model number, e.g. **HPD15-24S05-4**.
- An alternate pin-out version is available as an option. See mechanical drawings for details. To specify an HPD15 with the alternative pin-out (center pins), add the suffix '-C' to the model number, e.g. **HPD15-24S05-C**.
- All 2.1V and 3.3V outputs, 1 minute max.
