

KA7405D

2-Channel DC Motor Drive IC

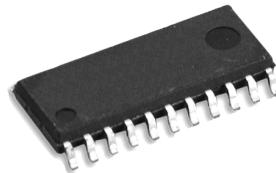

Features

- Output current up to 1.5A (Each channel).
- 4-function modes (CW, CCW, stop and brake) are controlled by 2-logic circuits.
- Operating voltage range: V_{CC} = 2.5 ~ 6.0V.
- Built-in spike killer diode.
- Low saturation voltage.

Description

The KA7405D is a monolithic integrated circuit, and suitable for the zoom and reel motor driver for camera, tape deck, any other consumer and industrial applications.

22-SOP-300

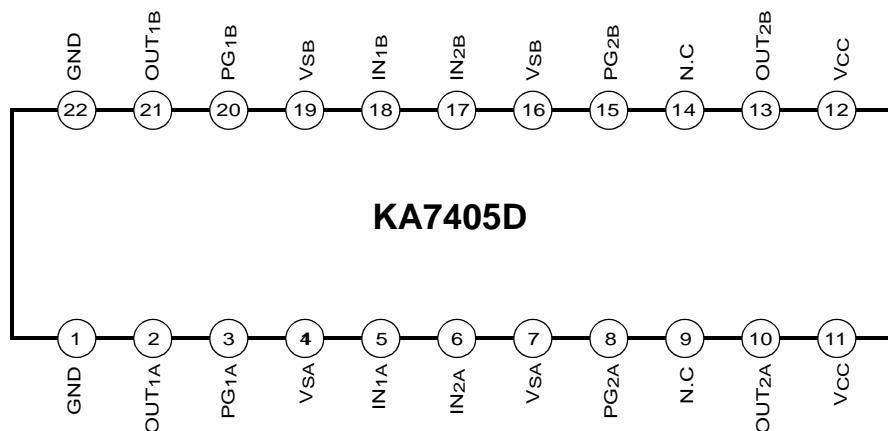

Typical Applications

- Camera zoom and film motors
- General DC motor

Ordering Information

Device	Package	Operating Temp.
KA7405D	22-SOP-300	-25°C to +75°C

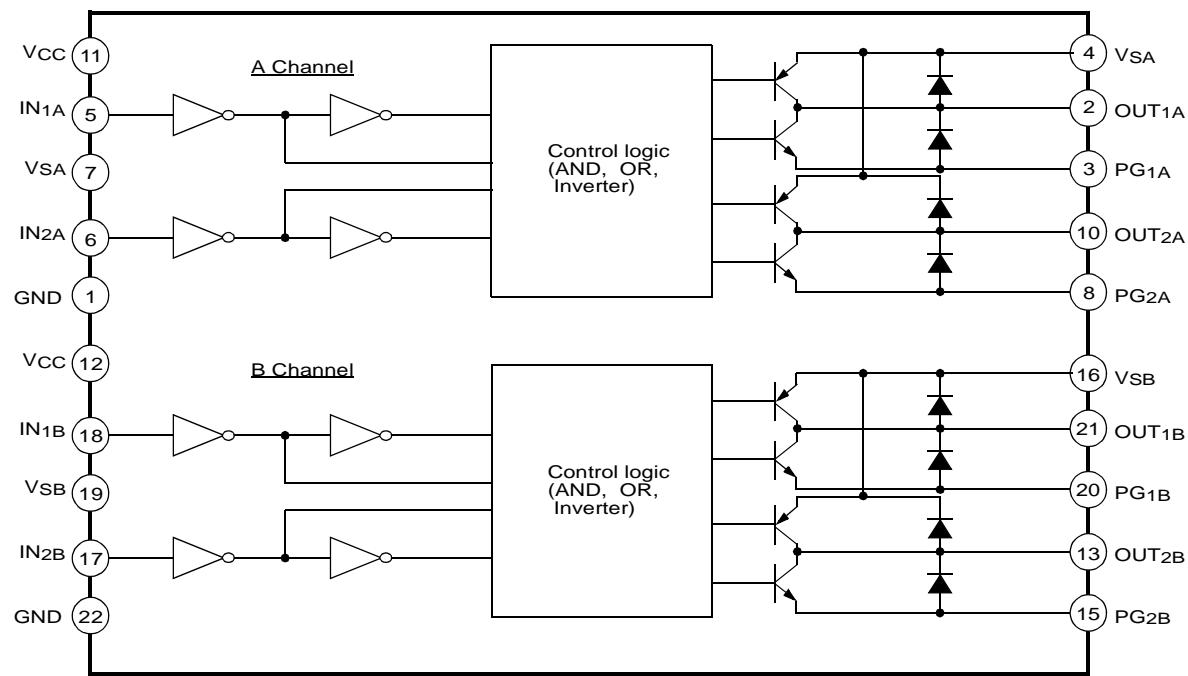

Pin Assignments

Pin Definitions

Pin Number	Pin Name	I/O	Pin Function Description	Remark
1	GND	-	Signal ground	-
2	OUT1A	O	Output 1	Channel A
3	PG1A	-	Power ground 1	Channel A
4	VSA	-	Output supply voltage	Channel A
5	IN1A	I	Input 1	Channel A
6	IN2A	I	Input 2	Channel A
7	VSA	-	Output supply voltage	Channel A
8	PG2A	-	Power ground 2	Channel A
9	NC	-	No connection	-
10	OUT2A	O	Output 2	-
11	VCC	-	Supply voltage	-
12	VCC	-	Supply voltage	-
13	OUT2B	O	Output 2	Channel B
14	NC	-	No connection	-
15	PG2B	-	Power ground 2	Channel B
16	VSB	-	Output supply voltage	Channel B
17	IN2B	I	Input 2	Channel B
18	IN1B	I	Input 1	Channel B
19	VSB	-	Output supply voltage	Channel B
20	PG1B	-	Power ground 1	Channel B
21	OUT1B	O	Output 1	Channel B
22	GND	-	Signal ground	-

Internal Block Diagram

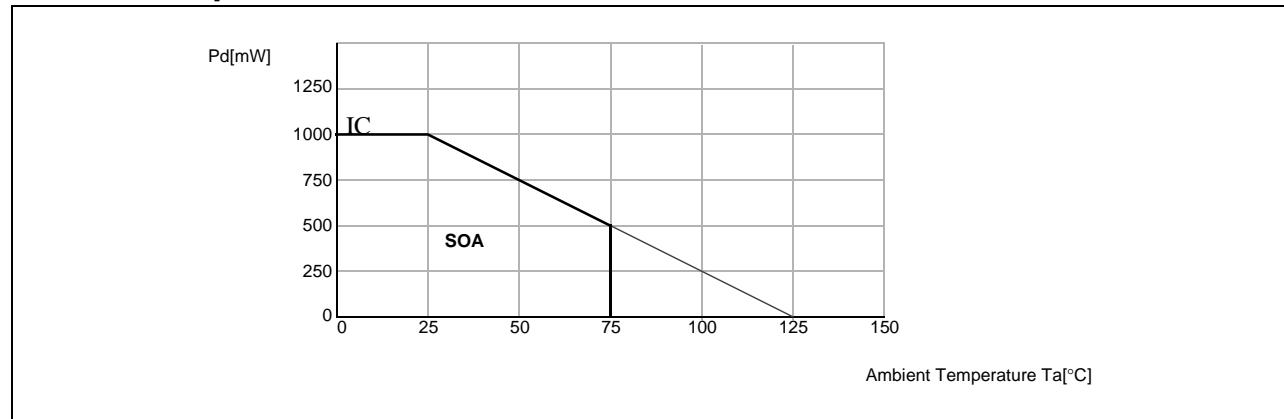

Equivalent Circuits

Description	Pin No.	Internal Circuit
Control Input		
IN1A	5	
IN2A	6	
IN1B	18	
IN2B	17	
VCC	11, 12	
GND	1, 22	
		<p>The internal circuit for the control input section consists of a Darlington pair. The collector of the first transistor is connected to pin 11 (VCC) through a 30kΩ resistor. The base of the second transistor is connected to the collector of the first, and its collector is connected to pin 12 (GND) through a 30kΩ resistor. The emitter of the second transistor is connected to ground (pin 1). The bases of both transistors are connected to pins 5 (IN1A) and 18 (IN1B) via resistors, and also to pins 6 (IN2A) and 17 (IN2B) via resistors. The emitters of the transistors are also connected to ground (pin 1).</p>
Motor Output		
OUT1A	2	
OUT2A	10	
OUT1B	21	
OUT2B	13	
VSA	4, 7	
VSB	16, 19	
PG1A	3	
PG2A	8	
PG1B	20	
PG2B	15	<p>The internal circuit for the motor output section features two Darlington pairs. The top pair has its collector connected to pin 21 (GND) through a 30kΩ resistor. Its base is connected to the collector of the bottom pair and to pins 4 (VSA), 7 (VSB), and 16 (PG1A) via resistors. The bottom pair's collector is connected to pin 2 (OUT1A) through a 30kΩ resistor. Its base is connected to the collector of the top pair and to pins 13 (VSA), 10 (VSB), and 19 (PG2A) via resistors. The emitters of both pairs are connected to ground (pin 1). There are also feedback paths from the collectors of the bottom pair back to their respective bases via resistors.</p>

Absolute Maximum Ratings (Ta = 25°C)

Parameter	Symbol	Value	Unit
Power supply voltage	V _{CCMAX}	6.0	V
Channel supply voltage	V _{SMAX}	6.0	V
Power dissipation	P _D	1000	mW
Operating temperature	T _{OPR}	-25 ~ +75	°C
Storage temperature	T _{STG}	-40 ~ +125	°C
Output current	I _{OMAX}	1.5	A

Power Dissipation Curve

Recommended Operating Conditions (Ta = 25°C)

Parameter	Symbol	Min.	Typ.	Max.	Unit

DISCLAIMER

FAIRCHILD SEMICONDUCTOR RESERVES THE RIGHT TO MAKE CHANGES WITHOUT FURTHER NOTICE TO ANY PRODUCTS HEREIN TO IMPROVE RELIABILITY, FUNCTION OR DESIGN. FAIRCHILD DOES NOT ASSUME ANY LIABILITY ARISING OUT OF THE APPLICATION OR USE OF ANY PRODUCT OR CIRCUIT DESCRIBED HEREIN; NEITHER DOES IT CONVEY ANY LICENSE UNDER ITS PATENT RIGHTS, NOR THE RIGHTS OF OTHERS.

LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF FAIRCHILD SEMICONDUCTOR INTERNATIONAL. As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user.
2. A critical component in any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
