LFO-17m-ip

Description:

LFO-17m-ip – is a series of optical modules based on 850nm VCSEL and coupled with multimode optical fiber. Hermetically sealed modules are performed in standard coaxial package with built-in InGaAs monitor photodiode and collimating ball lens. The modules operate in wide temperature range, have stable output power and more than $5 \cdot 10^5$ hours of lifetime.

LFO-17m-ip – are the best light sources for digital (up to 622 Mb/s) fiber-optic communication lines, optical testers, systems of optical synchronization and other applications.
