

# Photologic<sup>®</sup> Optically Coupled Isolators

## Types OPI125, OPI126, OPI127, OPI128

### Features

- Four output options
- 15kV input-to-output isolation voltage
- Direct TTL/STTL interface
- High noise immunity
- Data rates to 250 kBaud
- Hermetically sealed
- TX-TXV process available (see Hi-Rel section)
- UL recognized File No. E58730<sup>(5)</sup>

### Description

The OPI125, OPI126, OPI127, and OPI128 each contain a gallium arsenide infrared emitting diode coupled to a monolithic integrated circuit which incorporates a photodiode, a linear amplifier, and a Schmitt trigger on a single silicon chip. The devices feature TTL/LSTTL compatible logic level output which can drive up to 8 TTL loads directly without additional circuitry. Also featured are medium speed data rates to 250 kBaud with typical rise and fall times of 25 ns. Both the infrared emitting diode and the Photologic<sup>®</sup> sensor are in hermetically sealed packages for maximum long term stability and are mounted in a high dielectric plastic housing.
