

Six Element SMD Photodiode Array

Type OSM960, OSM960P

Features

- Surface mountable
 - Closely matched responsivity
 - High temperature operation

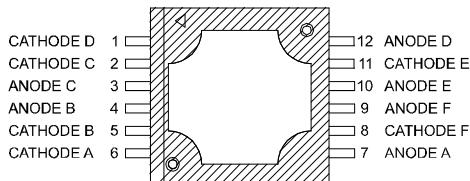

Description

The OSM960 is a six element photodiode array that has been specifically designed to meet the needs of motor encoder applications. Six individual chips are mounted on isolated cathode contacts to allow external connection in any desired configuration.

The plastic, gull-wing leaded packages are surface mountable and are compatible with automated manufacturing processes.
