

SILICON PHOTODIODE TYPE PSS1705

PSS1705 is a PIN Silicon PHOTODIODE with an Active Area 0.88 mm². It combines excellent blue light sensitivity with more than average Near IR response. This product is packaged in a ceramic case with a plastic lens. **Pacific Silicon Sensor Inc.** can also fabricate Silicon Detectors to your specifications.

SPECTRAL RESPONSE

OUTLINE DIMENSIONS

PHOTODIODE CHARACTERISTICS:

PART NO.	ACTIVE AREA mm ²	ACTIVE AREA (size) mm	DARK CURRENT nA @ 12V		CAPACITANCE PF @		RISE TIME @ 663 nm μs	NEP W/H ^{1/2} OV @ 663 nm
			TYP	MAX	0V	12V		
PSS1705	0.88	0.93 x 0.93	0.2	1	70	30	2	3 x 10 ⁻¹⁴

ABSOLUTE MAXIMUM RATINGS

DC Reverse Voltage	Peak DC Current	Storage Temperature	Operating Temperature	Soldering Temperature
30 volts	10 mA	-40°C to +100°C	-25°C to 75°C	240°C for 10 sec.
