

MIDI (Musical Instrument Digital Interface) / Game Port Filter/Protection Circuit

Features

- Integrated network contains 15 resistors, 10 capacitors, and ESD diodes
- ESD protection to greater than $\pm 4\text{kV}$ (MIL-STD-883 Method 3015) and greater than $\pm 8\text{kV}$ in-system

Applications

- Personal computers and gaming devices requiring EMI/RFI filtering and ESD protection for MIDI/Game Ports in a single package.

Product Description

The PACGAME1™ provides EMI filtering, pull-up termination and ESD protection for Game Port interfaces in one convenient device. The signals to and from a MIDI/Game Port controller generally contain high frequency components that emit unwanted EMI at the connector. Likewise, the signals from the MIDI/Game Port controller must be protected from any possible external electrical discharges typically caused by static electricity. The PACGAME1 provides these functions as well as a selectable pull-up function.

Simplified Electrical Schematic

Notes:

- 1) Component values: R1=4.7K, R2=47 Ω , R3=2.2K, C=470pF

PIN DESCRIPTIONS

PIN(S)	NAME	DESCRIPTION
3	BTN3_CTLR	Controller-side Joystick Button 3 channel.
4	BTN2_CTLR	Controller-side Joystick Button 2 channel.
5	BTN1_CTLR	Controller-side Joystick Button 1 channel.
6	BTN0_CTLR	Controller-side Joystick Button 0 channel.
7	SELECT	Select Input Typically tied to V_{CC} to pull up the BTN_x_CTLR and $MIDI_RX_CTLR$ inputs.
8	MIDI_TX_CTLR	Controller-side MIDI Transmit channel.
9	MIDI_RX_CTLR	Controller-side MIDI Receive channel.
10	JRC3_CTLR	Controller-side Axis Control 3 channel.
11	JRC2_CTLR	Controller-side Axis Control 2 channel.
12	JRC1_CTLR	Controller-side Axis Control 1 channel.
13	JRC0_CTLR	Controller-side Axis Control 0 channel.
16	JRC0_CONN	Connector-side Axis Control 0 channel.
17	JRC1_CONN	Connector-side Axis Control 1 channel.
18	JRC2_CONN	Connector-side Axis Control 2 channel.
19	JRC3_CONN	Connector-side Axis Control 3 channel.
20	MIDI_RX_CONN	Connector-side MIDI Receive channel.
21	MIDI_TX_CONN	Connector-side MIDI Transmit channel.
22	GND	Device ground reference.
23	BTN0_CONN	Connector-side Joystick Button 0 channel.
24	BTN1_CONN	Connector-side Joystick Button 1 channel.
25	BTN2_CONN	Connector-side Joystick Button 2 channel.
26	BTN3_CONN	Connector-side Joystick Button 3 channel.
1,2,14,15, 27,28	N.C.	No connect pins.

Ordering Information

PART ORDERING INFORMATION			
Package		Ordering Part Number ¹	
Pins	Style	Tape & Reel or Tubes	Part Marking
28	QSOP	PACGAME1Q	PACGAME1Q

Note 1: Parts are shipped in Tape & Reel form unless otherwise specified.

Specifications

ABSOLUTE MAXIMUM RATINGS		
PARAMETER	RATING	UNITS
Storage Temperature Range	-65 to +150	°C
DC Power to Resistor	100	mW
Package Power	1.0	W

STANDARD OPERATING CONDITIONS		
PARAMETER	RATING	UNITS
Operating Temperature Range	0 to +70	°C

ELECTRICAL OPERATING CHARACTERISTICS						
SYMBOL	PARAMETER	CONDITIONS	MIN	TYP	MAX	UNITS
TOL _{R1}	Absolute Tolerance of R1 Resistance				±20	%
TOL _{R2}	Absolute Tolerance of R2 Resistance				±20	%
TOL _{R3}	Absolute Tolerance of R3 Resistance				±20	%
TOL _{C1}	Absolute Tolerance of C1 Capacitance				±10	%
I _{LEAK}	Diode Leakage	@ 5.0V			±1	μA
V _{SIGNAL}	Signal Amplitude Range		-6		+6	V
V _{PP}	ESD Protection					
	1) Peak Discharge Voltage at any I/O (Human Body Model, MIL-STD-883, Method 3015)	Notes 2,5	±4			kV
	2) In-system Protection, HBM	Notes 3,5	±8			kV
	3) In-system Protection, IEC 61000-4-2, Level 3	Notes 3,4,5	±4			kV
V _{CL}	Channel Clamp Voltage at 8KV ESD Pulses, HBM	Notes 2,3			±30	V

Note 1: Specified at T_A=25°C unless otherwise specified.

Note 2: Human Body Model per MIL-STD-883, Method 3015, C_{Discharge} = 100pF; R_{Discharge} = 1.5KΩ; pin 7=5V; pin 22 grounded.

Note 3: Pin 22 grounded; pin 7 at V_{CC}; all other pins are open. ESD contact discharge between ground and pins 16, 17, 18, 19, 20, 21, 23, 24, 25, & 26, one at a time.

Note 4: Standard IEC 61000-4-2 with C_{Discharge} = 150pF, R_{Discharge} = 330Ω, pin 7=5V and pin 22 grounded.

Note 5: These parameters guaranteed by design.

Application Information

A system-level diagram illustrating the relationship between a MIDI/Game Port controller device, the PACGAME1 device, and a DB15 Game Port connector is shown in [Figure 1](#).

Mechanical Details

QSOP Mechanical Specifications:

PACGAME1 devices are packaged in 28-pin QSOP packages. Dimensions are presented below.

For complete information on the QSOP-28 package, see the California Micro Devices QSOP Package Information document.

PACKAGE DIMENSIONS				
Package	QSOP (JEDEC name is SSOP)			
Pins	28			
Dimensions	Millimeters		Inches	
	Min	Max	Min	Max
A	1.35	1.75	0.053	0.069
A1	0.10	0.25	0.004	0.010
B	0.20	0.30	0.008	0.012
C	0.18	0.25	0.007	0.010
D	9.80	9.98	0.386	0.393
E	3.81	3.98	0.150	0.157
e	0.64 BSC		0.025 BSC	
H	5.79	6.20	0.228	0.244
L	0.40	1.27	0.016	0.050
# per tube	50 pieces*			
# per tape and reel	2500 pieces			
Controlling Dimensions: inches				

* This is an approximate amount which may vary.
