* = Full voltage customer defines incoming voltage, lamp in holder is made to that voltage.
This holder contains no current limiting resistor. (Example RPLH30-24-01-05 [24 volt incoming source])
** 48 & 130VDC use an internal series resistor to drop the voltage across the LED bulb to 28 volts.
130VDC assemblies can also be used for 120VAC applications.
