CMOS SC-1420 Series

Description

The **SC-1420 Series** of quartz crystal oscillators provide enable/disable 3-state CMOS compatible signals for bus connected systems. Supplying Pin 1 of the SC-1420 units with a logic "1" or open enables its Pin 3 output. In the disable mode, Pin 3 presents a high impedance to the load.

Features

- Wide frequency range—1.0MHz to 106.250MHz
- User specified tolerance available
- Will withstand vapor phase temperatures of 253°C for 4 minutes maximum
- Space-saving alternative to discrete component oscillators
- High shock resistance, to 1000g
- Low Jitter
- No internal PLL avoids cascading PLL problems
- Metal lid electrically connects to ground to reduce EMI
- Gold plated pads
