

S400

AC / DC Line Monitor

DESCRIPTION

The S400 is a highly advanced optically isolated power monitor in an 8-pin dual-in-line epoxy package. It plugs into standard IC sockets as used in PC boards. The input is composed of back-to-back LEDs that can be connected in series with a limiting resistor across either AC or DC power loads to monitor their status. The output is a normally open MOS transistor capable of switching a 1 Amp pulsed load or up to 200mA of continuous load current.

FEATURES

- Monitor for AC or DC lines and loads
- Replacement for AC and DC input modules
- Feedback for "Closed Loop" systems
- Sensor for drop outs, hold overs, partial voltages, and zero-volt crossing

APPLICATIONS

- Long term reliability
- High Input / Output Isolation Voltage (up to 3750V_{rms})
- Adjustable delay on drop out
- 200mA continuous load rating
- Standard 8-pin DIP package
- Tape & Reel option available

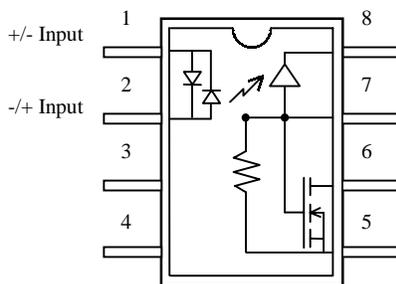

OPTIONS / SUFFIXES

- -H High Output Isolation
- -S Surface Mount Option
- -TR Tape and Reel

TYPICAL APPLICATIONS

Using an External Capacitor (C_o) to obtain Delay on Dropout

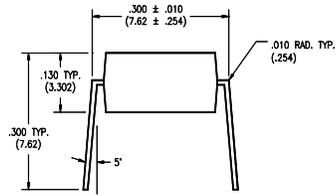

Using an External Resistor (R_o) to detect Zero-Volt Crossing

Using an Input Resistor (R_1) to detect Input Voltage Variation
