

## DESCRIPTION

The SM5102 is a silicon micro-machined, piezoresistive pressure sensing chip. These devices are available in full-scale ranges from 5 to 300 psi and are ideal for OEM and high volume applications.

Provided in die form, these sensors can be mounted on ceramic or PC board substrates as part of an OEM system. They also may be packaged into proprietary, or application specific sensor lines.

Die are probed, inked and diced, and shipped on tape or in waffle packs.

## FEATURES
