Footnotes:

- 1) Standard frequency stability (±20,±25,±50ppm & others available)
- 2) V_{OL}, V_{OH}, referenced to ground (V_{EE}) with V_{CC} = 2.5V
- 3) Jitter performance is frequency dependent. Please contact factory for full Wavecrest characterization.
- 4) T_{pd} is phse shift between the falling edge of pin 4 at 2.0V and the rising edge of pin 5 at 2.01V.
- 5) Open to enable pin also enables the output.
- 6) Consult factory for complete frequency range.
