

SBT-01A10 Humidity Transmitter

SBT-01A10 rod type relative humidity transmitter uses advanced high-polymer film humidity capacitor as sensing element, fitted with high property C/V, V/I conversion circuit. This transmitter has wide test range, high accuracy, far transmit range, working stability. It can combine with all instruments of our factory and DDZIII series element to constitute field humidity test and control system.

- test range : 0~100%RH
- test accuracy: $\pm 2\%$ -RH
- output sign range: 0~10mA
- load resistor: ≤ 500
- external dimensions : $\phi 20 \times 225$ mm
- power supply : DC 18V 1V
