

Photoelectric sensor retro-reflective sensor with polarisation filter S18SN6LPQ

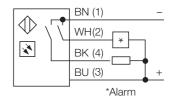

Туре	S18SN6LPQ
Ident-No.	3844100
Operating mode	Retro-reflective sensor with polarising filter
Type of light	red
Wave length	680 nm
Max. sensing range [m]	0,05 2 m
Operating temperature	-40+ 70 °C
Rated operational voltage (DC) U _B	10 30 VDC
Rated operational current (DC) I _e	≤150 mA
No-load current I ₀	≤30 mA
Short-circuit protection	yes, cyclic
Reverse polarity protection	yes
Output function	connection programmable, NPN
Switching frequency	≤160 Hz
Max. switch-on delay	≤100 ms
Overload trip point	>220 mA
Housing style	cylindrical/thread; S18
Dimensions	78,7 mm
Housing material	plastic, PBT
Lens	Plastic, Acryl
Degree of protection	IP68 - IP69K
Supply voltage indication	LED green
Switching status indication	LED yellow
Error indication	LED green flashing
Alarm indication	LED yellow flashing

- selectable light or dark operation or light operation with alarm function
- M12 x 1 connector
- operational voltage 10..0.30 VDC
- degree of protection IP69K

Wiring diagram

With retro-reflective sensors, emitter and receiver are incorporated in one compact housing. The light beam of the emitter is directed towards a reflector which returns the light back to the receiver. An object is detected when it interrupts this beam. Retro-reflective sensors have a high function gain and good contrast performance. Further it is merely required to install and wire a single device.

Excess gain curve

Excess gain in relation to the distance
