

Photoelectric sensor

diffuse mode sensor

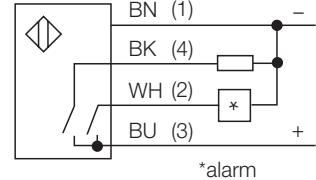

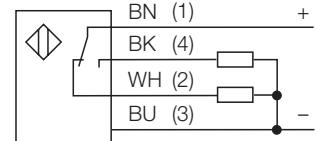

S18SP6DLQ

| | |
|---|------------------------------|
| Type | S18SP6DLQ |
| Ident-No. | 3844700 |
| Operating mode | |
| Type of light | Diffuse mode sensor |
| IR | |
| Wave length | 880 nm |
| Sensing range [mm] | 2... 300 mm |
| Operating temperature | -40 ...+ 70 °C |
| Rated operational voltage (DC) U_B | |
| Rated operational current (DC) I _e | 10... 30 VDC |
| No-load current I ₀ | ≤ 150 mA |
| Short-circuit protection | ≤ 25 mA |
| Reverse polarity protection | yes, cyclic |
| Output function | yes |
| Switching frequency | connection programmable, PNP |
| Max. switch-on delay | ≤ 160 Hz |
| Overload trip point | ≤ 100 ms |
| | >220 mA |
| Housing style | |
| Dimensions | cylindrical/thread; S18 |
| Housing material | 78,7 mm |
| Lens | plastic, PBT |
| Degree of protection | Plastic, Acryl |
| | IP68 - IP69K |
| Supply voltage indication | |
| Switching status indication | LED green |
| Error indication | LED yellow |
| Alarm indication | LED green flashing |
| | LED yellow flashing |

- selectable light or dark operation or light operation with alarm function
- M12 x 1 connector
- operational voltage 10..0.30 VDC
- degree of protection IP69K

Wiring diagram

Function principles

The emitter and receiver are incorporated in a single housing. The light reflection of the target is detected and triggers the sensor to switch. Thus the switching distance depends largely on the reflectivity of the target.

Excess gain curve

Excess gain in relation to the distance
