

## Optocoupler with Phototransistor Output

### Description

The TCMT11.. Series consist of a phototransistor optically coupled to a gallium arsenide infrared-emitting diode in an 4- lead up to 16- lead plastic Miniflat package.

The elements are mounted on one leadframe using a **coplanar technique**, providing a fixed distance between input and output for highest safety requirements.

### Applications

Programmable logic controllers, modems, answering machines, general applications

### Features

- Low profile package (half pitch)
- AC Isolation test voltage  $V_{i0} = 3.75 \text{ kV}_{\text{RMS}}$
- Low coupling capacitance of typical 0.3 pF
- **Current Transfer Ratio (CTR)** selected into groups
- Low temperature coefficient of CTR
- Wide ambient temperature range
- Underwriters Laboratory (UL) 1577 recognized, file number E-76222
- **CSA (C-UL) 1577** recognized file number E- 76222 - Double Protection
- Coupling System M

### Order Instruction

| Ordering Code | CTR Ranking | Remarks                |
|---------------|-------------|------------------------|
| TCMT1100      | 50 to 600%  | 4 Pin = Single channel |
| TCMT1101      | 40 to 80%   | 4 Pin = Single channel |
| TCMT1102      | 63 to 125%  | 4 Pin = Single channel |
| TCMT1103      | 100 to 200% | 4 Pin = Single channel |
| TCMT1104      | 160 to 320% | 4 Pin = Single channel |
| TCMT1105      | 50 to 150%  | 4 Pin = Single channel |
| TCMT1106      | 100 to 300% | 4 Pin = Single channel |
| TCMT1107      | 80 to 160%  | 4 Pin = Single channel |
| TCMT1108      | 130 to 260% | 4 Pin = Single channel |
| TCMT1109      | 200 to 400% | 4 Pin = Single channel |
| TCMT4100      | 50 to 600%  | 16 Pin = Quad channel  |

### Absolute Maximum Ratings

#### Input (Emitter)

| Parameter             | Test Conditions           | Symbol    | Value | Unit       |
|-----------------------|---------------------------|-----------|-------|------------|
| Reverse voltage       |                           | $V_R$     | 6     | V          |
| Forward current       |                           | $I_F$     | 60    | mA         |
| Forward surge current | $t_p \leq 10 \mu s$       | $I_{FSM}$ | 1.5   | A          |
| Power dissipation     | $T_{amb} \leq 25^\circ C$ | $P_V$     | 100   | mW         |
| Junction temperature  |                           | $T_j$     | 125   | $^\circ C$ |

#### Output (Detector)

| Parameter                 | Test Conditions               | Symbol    | Value | Unit       |
|---------------------------|-------------------------------|-----------|-------|------------|
| Collector emitter voltage |                               | $V_{CEO}$ | 70    | V          |
| Emitter collector voltage |                               | $V_{ECO}$ | 7     | V          |
| Collector current         |                               | $I_C$     | 50    | mA         |
| Peak collector current    | $t_p/T = 0.5, t_p \leq 10 ms$ | $I_{CM}$  | 100   | mA         |
| Power dissipation         | $T_{amb} \leq 25^\circ C$     | $P_V$     | 150   | mW         |
| Junction temperature      |                               | $T_j$     | 125   | $^\circ C$ |

#### Coupler

| Parameter                           | Test Conditions           | Symbol        | Value       | Unit       |
|-------------------------------------|---------------------------|---------------|-------------|------------|

### Ozone Depleting Substances Policy Statement

It is the policy of **Vishay Semiconductor GmbH** to

1. Meet all present and future national and international statutory requirements.
2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

**Vishay Semiconductor GmbH** has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

1. Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

**Vishay Semiconductor GmbH** can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

**We reserve the right to make changes to improve technical design and may do so without further notice.**

Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use Vishay Telefunken products for any unintended or unauthorized application, the buyer shall indemnify Vishay Telefunken against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.
