

High Efficiency Blue LED, ø 5 mm Untinted Non - Diffused Package

Color	Type	Technology	Angle of Half Intensity $\pm\varphi$
Blue	TLHB510.	GaN on SiC	9°

Description

This device has been designed in GaN on SiC technology to meet the increasing demand for high efficiency blue LEDs.

It is housed in a 5 mm waterclear plastic package. All packing units are categorized in luminous intensity groups. That allows users to assemble LEDs with uniform appearance.

94 8631

Features

- GaN on SiC technology
- Standard ø 5 mm T-1 ³/₄ package
- Small mechanical tolerances
- Small viewing angle
- Very high intensity
- Luminous intensity categorized
- ESD class 1

Applications

Status lights
OFF / ON indicator
Background illumination
Readout lights
Maintenance lights
Legend light

Absolute Maximum Ratings

T_{amb} = 25°C, unless otherwise specified

TLHB510.

Parameter	Test Conditions	Symbol	Value	Unit
Reverse voltage		V _R	5	V
DC forward current	T _{amb} ≤ 65°C	I _F	20	mA
Surge forward current	t _p ≤ 10 μs	I _{FSM}	0.1	A
Power dissipation	T _{amb} ≤ 65°C	P _V	100	mW
Junction temperature		T _j	100	°C
Operating temperature range		T _{amb}	-40 to +100	°C
Storage temperature range		T _{stg}	-40 to +100	°C
Soldering temperature	t ≤ 5 s, 2 mm from body	T _{sd}	260	°C
Thermal resistance junction/ambient		R _{thJA}	350	K/W

Optical and Electrical Characteristics

$T_{amb} = 25^{\circ}\text{C}$, unless otherwise specified

Blue (TLHB510.)

Parameter	Test Conditions	Type	Symbol	Min	Typ	Max	Unit
Luminous intensity	$I_F = 20\text{ mA}$	TLHB5100	I_V	66	210		mcd
		TLHB5101	I_V	130		260	mcd
		TLHB5102	I_V	130		360	mcd
Dominant wavelength	$I_F = 10\text{ mA}$		λ_d		466		nm
Peak wavelength	$I_F = 10\text{ mA}$		λ_p		428		nm
Angle of half intensity	$I_F = 10\text{ mA}$		ϕ		± 9		deg
Forward voltage	$I_F = 20\text{ mA}$		V_F		3.9	4.5	V
Reverse voltage	$I_R = 10\text{ }\mu\text{A}$		V_R	5			V

Typical Characteristics ($T_{amb} = 25^{\circ}\text{C}$, unless otherwise specified)

Ozone Depleting Substances Policy Statement

It is the policy of **Vishay Semiconductor GmbH** to

1. Meet all present and future national and international statutory requirements.
2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

Vishay Semiconductor GmbH has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

1. Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

Vishay Semiconductor GmbH can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

We reserve the right to make changes to improve technical design and may do so without further notice.

Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use Vishay-Telefunken products for any unintended or unauthorized application, the buyer shall indemnify Vishay-Telefunken against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.
