

## 3 FUNCTION DECODER FOR REMOTE CONTROLLER

### DESCRIPTION

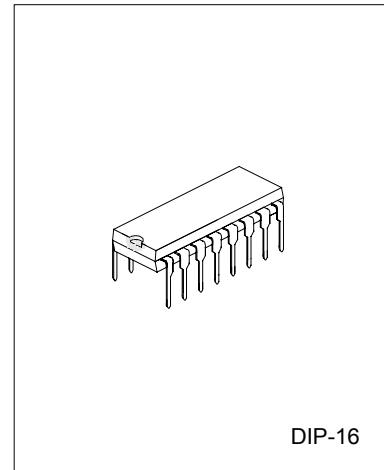

The UTC RCR03 is CMOS LST designed for the remote controlled toy. The received signal is amplified by the three-stage amplifier, and then the appropriate amplified signal is sampled, fault-tolerantly checked and decoded to control the actions of the remotecontrolled toy. There is an oscillator in the RCR03. By adding an external resistor conveniently, the oscillator will be construted. The oscillator frequency can be adjusted by the external resistor. Pressing the ON/OFF button can control the output level of the PC pin.

The UTC RCR03, the auto-power-off functionsis achieved by an internal counter. When the RCR03 is powered on the counter is reset and begin to count. Any received encoding signal also reset the counter. The PC output pin will keep on a high level until the counter counts up to about 6 minutes. The PC output is used to control on/off state of the external power supply.

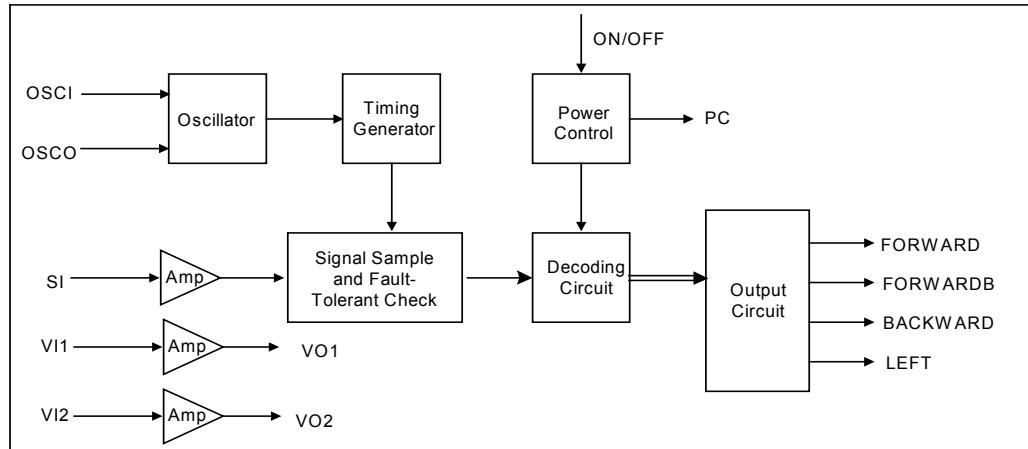

The UTC RCR03 have four output pins corresponding with the three actions: Forward, Backward and Left.

### FEATURES

- \* Operating power-supply voltage range: 2.5 to 5.5V
- \* Manual-power-on/off with ON/OFF button
- \*One output pin used for external power control
- \*On-chip oscillator with an external resistor
- \*On-chip reversing amplifiers
- \*Low operating current
- \*Few external components needed
- \*Four output pins for three function
- \*Manual Power on/off function

## PRODUCT PIN CONFIGURATION AND DESCRIPTION

VO2	1	16	VI2
PC	2	15	VO1
GND	3	14	VI1
SI	4	13	ON/OFF
OSCI	5	12	VDD
NC	6	11	FORWARD
OSCO	7	10	FORWARDB
BACKWARD	8	9	LEFT

PIN NO.	PIN NAME	DESCRIPTION
1	VO2	Output pin for the amplifier 2
2	PC	Power control output pin
3	GND	Negative power supply
4	SI	Input pin of the encoding signal
5	OSCI	Oscillator input pin
6	NC	No Connection
7	OSCO	Oscillator output pin
8	BACKWARD	Backward output pin
9	LEFT	Left output pin
10	FORWARDDB	Reversing output of the forward pin
11	FORWARD	Forward output pin
12	VDD	Positive power supply
13	ON/OFF	Input pin used to control the output level of the PC
14	VI1	Input pin for the amplifier 1
15	VO1	Output pin for the amplifier 1
16	VI2	Input pin for the amplifier 2
