

W7200-Type 200 GHz Thin-Film Multiplexers and Demultiplexers

The W7200-type 200 GHz thin-film multiplexers (MUX) and demultiplexers (deMUX) are characterized by high-adjacent and nonadjacent channel isolation, excellent directivity, and very low optical loss values.

Features

- Excellent band shape
- High channel isolation
- Low insertion loss
- Epoxy-free optical path
- High reliability
- Thermal stability
- Compact design
- High economy

Applications

- DWDM transmission
- DWDM-based add/drop multiplexing
- Wavelength-selective routing

Description

The W7200-type 200 GHz thin-film filter multiplexers (MUXs) and demultiplexers (deMUXs) are part of a family of high-performance, cost-effective MUX/deMUX modules offered by Agere Systems for use in DWDM systems.

Agere Systems' manufacturing capability, which spans filter processing through module and rack-mount assembly, ensures quality and total supply line control. Proprietary, automated, deterministic process control of filter manufacturing enables high-volume production and ensures precise optical performance at the module level.

The thin-film filters used in the MUX/deMUX modules possess very low, uniform insertion and reflection loss, excellent band shape and thermal stability, and low polarization-dependent loss (PDL). When combined with a packaging capability that emphasizes high thermal and mechanical stability, the resulting MUX/deMUX modules exhibit high adjacent and non-adjacent channel isolation, excellent directivity, and very low optical loss values. Devices and modules conform to *Telcordia Technologies*[®] GR-1221 and GR-63 criteria.

Designed to be customized, the modules can be configured to meet customer-specific channel and wavelength plans as well as unique packaging requirements.

Absolute Maximum Ratings

Table 1. Absolute Maximum Ratings

Parameter	Symbol	Min	Max	Unit
Operating Case Temperature Range	T _{OP}	0	70	°C
Storage Temperature Range	T _{stg}	-40	85	°C

Characteristics

Table 2. W7200-Type 200 GHz Thin-film MUX/DeMUX Optical Characteristics¹

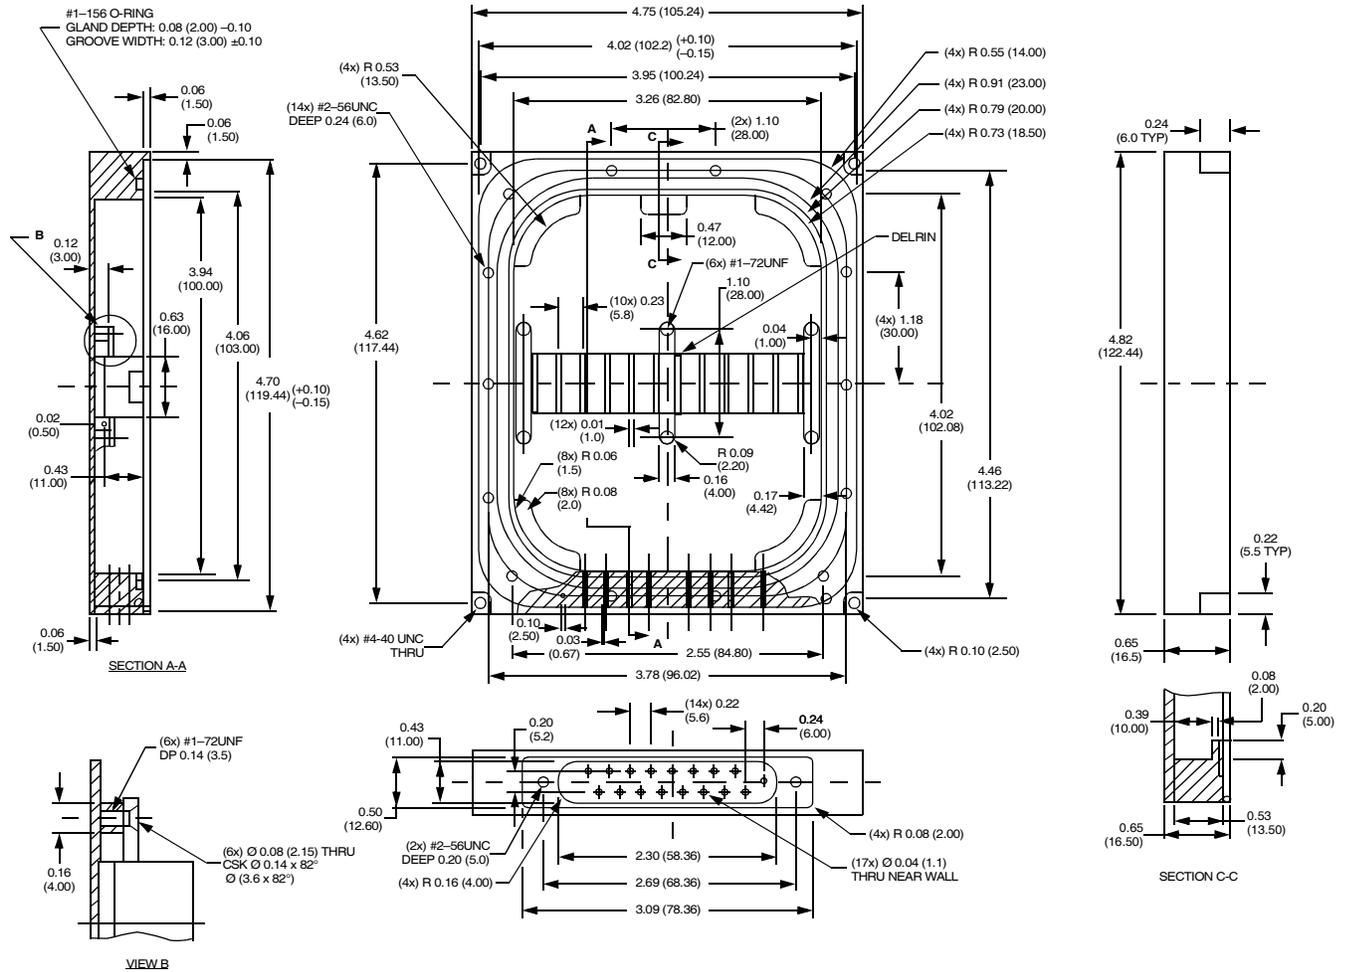

Parameter	Number of Channels				Unit
	1 x 4	1 x 8	1 x 16	1 x 20	
Channel Spacing	200				GHz
Center Wavelength Accuracy	±0.1				nm
Channel Pass Band, 0.5 dB Bandwidth (min)	0.75				nm
Insertion Loss (typ)	1.6	2.4	2.8	2.9	dB
Insertion Loss (max)	1.9	2.6	3.0	3.1	dB
Pass Band Flatness (ripple) (max)	0.5				dB
Channel Uniformity	1.0	1.0	1.0	1.5	dB
Adjacent Channel Isolation (min)	28				dB
Nonadjacent Channel Isolation (min)	40				dB
Directivity (min)	55				dB
Optical Return Loss (min)	45				dB
Polarization-dependent Loss (PDL) (max)	0.1				dB
Thermal Stability (max)	0.004				dB/°C
Thermal Wavelength Drift (max)	0.001				nm/°C
Optical Power Handling Capability (max)	500				mW
Module Dimensions	105 x 61 x 12	105 x 61 x 16.5	105 x 122 x 16.5	116 x 122 x 16.5	mm

1. Values are referenced without connector loss.
