

# Low Inductance Capacitors

## 0612/0508 IDC (InterDigitized Capacitors)

### GENERAL DESCRIPTION

- Very low equivalent series inductance (ESL), surface mountable, high speed decoupling capacitor in 0612 and 0508 case size.
- Measured inductances of 120 pH (for 0612) and 95 pH (for 0508) are the lowest in the FR4 mountable device family.
- Opposing current flow creates opposing magnetic fields. This causes the fields to cancel, effectively reducing the equivalent series inductance.
- Perfect solution for decoupling high speed microprocessors by allowing the engineers to lower the power delivery inductance of the entire system through the use of eight vias.
- Overall reduction in decoupling components due to very low series inductance and high capacitance.

### HOW TO ORDER

| W        | 3           | L              | 1              | 6                               | D          | 225              | M                        | A            | T                       | 3                   | A         |
|----------|-------------|----------------|----------------|---------------------------------|------------|------------------|--------------------------|--------------|-------------------------|---------------------|-----------|
| Style    | Case Size   | Low Inductance | Number of Caps | Voltage                         | Dielectric | Capacitance Code | Capacitance Tolerance    | Failure Rate | Termination             | Packaging Available | Thickness |
| 2 = 0508 | ESL = 95pH  | 4 = 4V         | C = X7R        | 2 Sig. Digits + Number of Zeros | K = ±10%   | A = N/A          | T = Plated Ni and Solder | 1=7" Reel    | Max. Thickness mm (in.) |                     |           |

### PERFORMANCE CHARACTERISTICS

|                                      |   |
|--------------------------------------|---|
| Capacitance Tolerance                | ±20% Preferred (10% Available)                            |
| Operation                            | X7R = -55°C to +125°C;                                    |
| Temperature Range                    | X5R = -55°C to +85°C                                      |
| Temperature Coefficient              | ±15% (0VDC)   |
| Voltage Ratings                      | 4, 6.3, 10, 16 VDC  |
| Dissipation Factor                   | 4V, 6.3V = 6.5% max;<br>10V = 5.0% max;<br>16V = 3.5% max |
| Insulation Resistance (@+25°C, RVDC) | 100,000MΩ min, or 1,000MΩ per µF min., whichever is less  |

|                        |   |
|------------------------|---|
| Dielectric Strength    | No problems observed after 2.5 x RVDC for 5 seconds at 50mA max current |
| CTE (ppm/C)            | 12.0  |
| Thermal Conductivity   | 4-5W/M K  |
| Terminations Available | Plated Nickel and Solder  |
| Max. Thickness         | 0.037" (0.95mm)   |

### TYPICAL ESL AND IMPEDANCE

| Package Style   | Measured Inductance (pH) |
|-----------------|--------------------------|
| 1206 MLCC       | 1200                     |
| 0612 LICC       | 450                      |
| <b>0612 IDC</b> | <b>120</b>               |
| <b>0508 IDC</b> | <b>95</b>                |
