

WSBB Temperature and humidity Transmitter

WSBB is the wallmount type integral temperature and humidity transmitter which with current or voltage output.

It uses advanced high-polymer film humidity capacitor as sensing element, so the instrument has the characteristics of test range widely, high sensitivity, fine linearity, work stability, far transmit range and easy to use. It can combine with all instruments of our factory and DDZ-III series element to constitute field temperature and humidity test and control system.

- test range : humidity 0~100%RH
- test accuracy: humidity $\pm 5\%RH$

temperature 0~50℃
temperature 1℃

- temperature dependence : $\leq \pm 0.3\%RH/^\circ C$ (base data 25℃)

- output type: 0~10mA; 4~20mA; 0~5V; 0~10V
- external dimensions : 80×40×120 mm
- power supply : DC 18V~24V
